

# Video Sources Management Demonstration **AVAS-OR** Advantech Video Archiving and Streaming for Intelligent Operating Rooms

AD\ANTECH IHealthcare

XY .

# **AVAS Solutions**

With the increased complexity of surgical procedures, several factors including the use of diverse image sources, lack of surgical technique storage systems, and external communication difficulties are reducing the efficiency of operating room workflows. Advantech's AVAS solutions support real-time image and video streaming, centralized control, remote teaching and consultation, and cloud-based management in order to streamline operating room workflows and improve overall efficiency.

AVAS solutions comprise monitors, workstations, and systems that facilitate medical imaging integration, HD broadcasts, zero latency video, and remote learning and consultation. With AVAS, integrated surgery and patient data can be accessed via switchable displays, enabling convenient management of medical surgery records and enhanced workflow efficiency.

## For Streaming AVAS 2 Series

### **NDCoder**

AVAS-200 is an IP-based data transmission system with a single-cable distribution architecture designed for operating rooms. This system supports video, audio, and control signal streaming with low latency and allows rapid switching between streams. Moreover, video data can be transmitted over 10 Gigabit Ethernet without compression or data loss.

## For Record & Management AVAS 4 Series

## Streaming Console and VMS Server

AVAS-400 is a powerful integrated imaging hub equipped with software development APIs for customizing video and imaging streams according to application requirements. With AVAS-400, video signals can be collected from multiple sources and integrated for simultaneous display on monitors with diverse configurations.

## For Procedure AVAS-60

## Mobile Intraoperative Workstation

AVAS-60 is a versatile mobile workstation for conducting surgical demonstrations and consultations. Equipped with a movable camera, built-in codec box, video switch card, and dual display support, AVAS-60 is designed to support remote intraoperative monitoring, mobile healthcare delivery, and imaging-intensive applications.

## **Medical Computers**

As the core operating room infrastructure, these systems provide access to intraoperative imaging data and video streams to enable centralized management of all surgical processes for an efficient and integrated operating room.

## **Medical Displays**

Equipped with hybrid gamma functionality to support the simultaneous display of monochrome and color images with varying gamma curves, these medical displays offer exceptional image quality for operating room applications.

## **Medical Tablets**

Featuring an IP65 rating for superior infection control, Advantech's medical tablets enable mobile real-time access, management, and control of all intraoperative imaging and video streams for increased operational efficiency.

## **Streaming API and SDK**

API & SDF

Advantech's AVAS SDK provides recording, captured video streaming, broadcasting, files playback and editing and APIs that allow hospitals and system integrators to easily develop software solutions that satisfy their usage needs.

## **Zero Latency**

Imaging data is transmitted at the same frame rate with zero latency, ensuring uninterrupted real-time communication between collaborating physicians located remotely.

## **Open API and SDK**

The provision of open APIs and SDKs ensure easy integration with existing infrastructure and management systems.

## **4K End-to-End Resolution**

Medical images can be displayed with greater accuracy, clarity, and detail to enable more precise diagnoses.

## **Multi-View**

Multi-view functionality supports the simultaneous display of four image streams on a single monitor.

## **Seamless Switching**

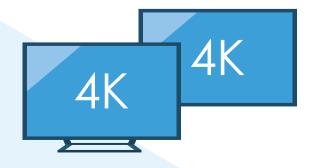

Integrated switching technology enables glitch-free transitions between input sources for seamless switching and consistent visual performance.

## **Medical-Grade Certification**

All AVAS computers, displays, and tablets are certified to relevant medical standards for infection control and patient safety.

# **AVAS-200 Series**

- Supports both encoding and decoding
- All video, image, audio, and USB signals are transmitted via 10 Gigabit Ethernet
- Multi-view functionality supports the simultaneous display of four image streams on a single monitor
- Integrated switching technology enables seamless switching between input sources
- Easy navigation and control with a mouse or keyboard, even in Quad-View or Multi-View modes
- Open APIs and SDKs ensure easy integration with existing infrastructure and management systems

# **AVAS-400 Series**

- 7" display panel with dual input support
- Supports 4K and 2K resolutions to enable simultaneous recording of two video channels
- Video signals can be recorded to the internal hard disk drive, a Blu-ray recorder,
- connected USB drive, and network server
- Programmable hotkeys for more efficient control
- Supports Windows 10, 8, 8.1, 7/Windows Server 2012, 2012 R2, 2008 R2/Linux Kernel, CE/FCC/EN60601-1/UL-60601-1/CCC certifications

- Intraoperative mobile workstation for convenient video recording and distribution
- 4K surgical field cameras with adjustable viewing angle for superior in-operation recording
- Supports dual-channel, multi-format 4K video input
- Mobile workstation eliminates the limitations of traditional ORs

# **AKostec Series**

- High-brightness, high contrast ratio surgical displays with Ultra HD 4K resolution
- Wide range of monitor sizes available
- LED backlighting for increased energy efficiency
- Supports multi-view display (Normal, PiP, PBP, 4P)
- Multimodal input interface for displaying images of differing modality simultaneously
- 14-bit lookup table for image processing
- Compliant with the DICOM Part 14: Grayscale Standard Display Function
- Variable gamma and DICOM (color temperature) modes

## **POC Series**

- ▶ Runs on an Intel® Core™ 6th generation processor with a fanless, high performance profile
- 24" full HD resolution, IPS LCD with edge to edge, bezel-less design
- USB 3.0 and PClex4 expansion slot, mini PCle slot x 2
- > Offers a multi-touch option to deliver a truly unmatched touchscreen experienceOptional
- IP54 enclosure to protect against dust and water splashing for ease of cleaning
- Isolated design provides unique electric leakage protection for COM ports, and LAN ports, and optional USB port
- Support Intel® firmware trusted platform module (TPM) with Intel® Platform Trust Technology (Intel® PTT)
