

# How does Airvida purify air with negative ions?

With ible's exclusive "Breathing Pathway Eco Ion Technology," 2 million negative ions/cm<sup>3</sup> are gathered around users' facial area. Such great number of ions form an invisible shield against harmful airborne particles.

Airvida, certified by several international labs, can effectively remove allergens, PM2.5, and virus.

Generates more than **20 million ions/cm<sup>3</sup>** every 0.6 seconds

Effectively gathers **2 million negative ions/cm<sup>3</sup>** around the user's facial area

According to Japan's research lab, Airvida can make 2,572 µg/m<sup>3</sup> PM2.5 fall to the ground per second, which is around 5 times more than the highest level of AQI air quality measure (500 µg/m<sup>3</sup>).

ible

## The efficacy is certified by International laboratories and recognized by international awards.

## Airvida Wearable Ionic Air Purifier

Effectively reduce inhalable pollen/allergens, bacteria, virus, and PM2.5

\*Refer to the official test reports from Japan Far Infrared Rays Association and Japan Kitasato Research Center for Environmental Science.

# Why do you need an Airvida?

Can provide protection by generating more than 20 million negative ions/cm<sup>3</sup> every 0.6 second and gathering 2 million ions/cm<sup>3</sup> in the facial area (equal to the ion concentration of 100 forests)

Scientifically proven to reduce inhalable pollen, allergens, virus, bacteria, smoke, PM2.5, and pet dander

Superlight (20/ 70g) and stylish, comfortable to wear and suit daily outfit

Airvida L1

Airvida C1

# Airvida gives you protection in various occasions

Hay Fever, Allergen

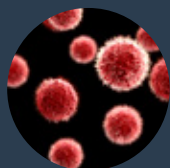

Air Pollution

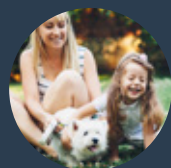

Secondhand smoke

Public Transportation

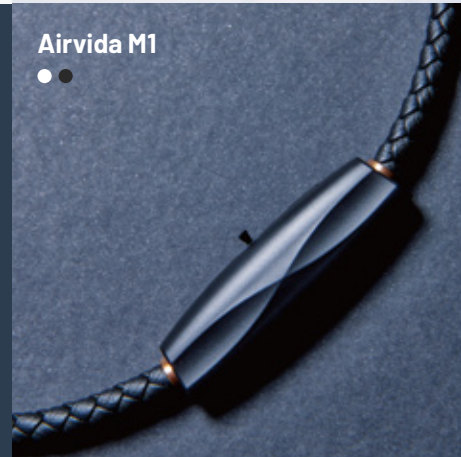

Airborne allergy

Pet Dander Allergy

Airvida M1

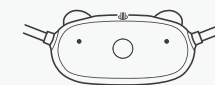

\* It can be used with a titanium necklace, a collar clip, or a charging dock for different occasions.

Airvida M1

Airvida L1

Airvida C1

**Weight:** 20g

**Negative ions concentration:**

Airvida emits 20 million negative ions/cm<sup>3</sup> per 0.6 seconds, and effectively gathers 2 million negative ions/cm<sup>3</sup> around the user's facial area.

**Battery life:** up to 28 hours operation on one charge

**Dimension:** 5.7x2.0x1.4cm

**Colors:** Space Black/ Pearl White

**Weight:** 70g

**Negative ions concentration:**

Airvida emits 20 million negative ions/cm<sup>3</sup> per 0.6 seconds, and effectively gathers 2 million negative ions/cm<sup>3</sup> around the user's facial area.

**Battery life:** up to 32 hours operation on one charge

**Dimension:** 16.9x13.3x6.1cm

**Colors:** Space Black/ Pearl White/ Soft Pink

**Weight:** 22g

**Negative ions concentration:**

Airvida emits 20 million negative ions/cm<sup>3</sup> per 0.6 seconds, and effectively gathers 2 million negative ions/cm<sup>3</sup> around the user's facial area.

**Battery life:** up to 28 hours operation on one charge

**Dimension:** 4.9x2.5x2.0cm

**Colors:** Duckling Yellow/ Koala Grey/ Piggy Pink

## About ible

ible Tech., founded in 2015, is an IOT and wearable device company aiming to provide efficient, safe, and elegant products for our loved ones. ible's R&D team members come from several top Taiwanese technology companies. With their expertise and creativity, ible is able to develop products that bring value to consumers and fulfill the highest standards of material (RoHS), performance, efficiency optimization (SGS & JIRA & FIA reports), and safety regulation (CE & FCC & UL).

## Highly recommended from people with allergy issue
